ABSTRACT

This report presents Arizona dropout statistics for 4 academic years, 1994-98. For each year, dropout rates are reported for grades 7-12 and are based on a calendar year running from the first day of summer recess through the last day of school. Most of the report consists of data tables that provide enrollment and dropout information for individual schools, school districts, and counties, and for the state categorized by grade, gender, and ethnicity. Enrollment and dropout rates are presented separately for grades 9-12 and grades 7-8. At the end of 1997-98, there were 376,675 Arizona students enrolled in grades 7-12, of which over 31,000 were reported as dropouts. The state dropout rate for grades 9-12 for the 4 years ranged from 11.5 to 12.8 percent. Males tended to drop out more frequently than females, and American Indian students had the highest dropout rates, followed by Hispanic students. An introduction includes the dropout data reporting requirement, definitions, and information on transfer documentation. (SV)

Research and Policy

Mission Statement

The Research and Policy division (R&P) is a nonpartisan research arm of the Arizona Department of Education whose mission consists of three major components. First, we are committed to supporting local school districts and charter schools. The R&P division engages in aggressive outreach in order to incorporate local input into all of our work. It is our goal to develop a research infrastructure to conduct prospective analyses of important educational issues to inform all of our stakeholders. Second, we endeavor to establish a productive dialogue with policy makers at all levels. In particular, we collaborate with state legislators on the research aspects of legislation. Third, we are dedicated to producing quality research. The R&P division is responsible for conducting various program evaluations, independent research studies and completing mandated reports such as the *Dropout Rate Study*.

Dropout rates are often regarded as key indicators of a successful public school system. Therefore, it is essential to provide local schools, districts, state legislators and members of the community with reliable data in which to monitor a school's success. Given the importance of this data, it is our commitment to continually produce the annual *Dropout Rate Study* in a timely and accurate manner.

EXECUTIVE SUMMARY

The calculation of dropout statistics is a cooperative effort of the local school districts, the Arizona Department of Education (ADE), the Arizona State Legislature, and the United States Department of Education. Presently, the emphasis on education reform mandates greater attention to performance measures, such as the dropout rate, which can serve as a key indicator of a school's success in maintaining their student population.

Ordinarily, the ADE reports one year's dropout statistics for Arizona school districts. For this particular study, however, the R&P division has included dropout rate statistics for academic years 1994-95, 1995-96, 1996-97 and 1997-98. This study, which begins with the 1997-98 school year, contains dropout rate information for individual schools, districts, counties and the state categorized by grade, gender and ethnicity. In addition, the data provides actual student enrollment and dropout counts as well as status unknown rates.

* * * * * * * * * * * * * * * *

For this study, dropout rates are reported for grades 7 through 12 and are based on a calendar year that runs from the first day of summer recess through the last day of school. A school's total enrollment is used as the population figure against which dropouts are subsequently counted. Because Arizona law allows school districts five years in which to make necessary corrections to their data, enrollment data reported by districts may not necessarily agree with the enrollment data reported herein.

It is important to note that this particular study produces a "snap shot" of Arizona dropout activity in that it provides information only on students who drop out during one school year. The *Graduation Rate Study*, however, is a longitudinal study that tracks graduate and dropout activity over a four-year period for a particular cohort of students.

For purposes of this study, **dropouts** are defined as students who were enrolled in school at any time during the school year, but were not enrolled at the end of the school year and did not transfer to another school, graduate or die. **Summer dropouts** are defined as students who were enrolled at the end of the prior school year, failed to enroll at the beginning of the following school year, and their absence cannot be explained by graduation, transfer or death. These students are counted as summer dropouts from the grades in which they were *expected* to enroll.

General Overview

According to information supplied by local school districts and charter schools, there were 376,675 Arizona students enrolled in grades 7 through 12 at the end of the 1997-1998 school year. Of that total, more than 31,000 students were reported as dropouts. Data submitted over the past four consecutive years indicate, among other things, that males tend to drop out more frequently than females, and American Indian students have the highest dropout numbers followed by Hispanic students.

The dropout rates for academic years 1994-95, 1995-96, 1996-97 and 1997-98 are generalized in the table and chart that follow.

INTRODUCTION

Collection of dropout statistics in response to the need for more accurate, comparable and timely student dropout information involves the cooperative efforts of local school districts, the ADE, the Arizona Legislature and the United States Department of Education (USDOE). The present emphasis on education reform demands greater attention to performance indicators. Dropout rates in particular are frequently regarded as key indicators of the success or failure of a public school system. Successful school completion has been selected as both a state and a national goal of education reform efforts.

Dropout Data Reporting Requirement and Reporting Period

In 1987, the Arizona Legislature mandated the performance of an annual dropout rate study to measure the success of dropout prevention efforts. All Arizona public school districts and charter schools teaching students in grades 7 through 12 are required to submit dropout data annually. The dropout rate study measures the proportion of students who drop out of school during a twelve-month period, which begins the first day of summer recess and ends the last day of school. Dropout data collected under Arizona law do not meet current federal dropout data definitions and guidelines set forth by the USDOE. Thus, Arizona statistics ***are not comparable*** to dropout statistics from other states using the USDOE standards.

DEFINITIONS

Enrollment is defined as the total count of students who were enrolled on the first day of summer recess, or at any time during the following school year, and used as the population figure against which dropouts are subsequently counted. Moreover, it is seen as a roster that changes continually (even during the summer months) as students enroll, transfer to other schools, dropout or graduate. Schools are responsible for monitoring and reporting their enrollment from the end of the prior school year to the last day of the reported school year. Students who are promoted from elementary feeder schools become the responsibility of the schools in which they are expected to enroll.

An unduplicated enrollment count is used to calculate dropout rates more accurately. For example, a student who attends High School A in District X has the potential to be a dropout from that school and is counted as one student served at High School A. If that student transfers midyear to High School B, **within the same district,** the student now gains the potential of being counted as a dropout at that school and is counted as a student served at High School B. However, at the **district level,** the student should count as only **one** student served by District X in calculating the **district** dropout rate. The means of ensuring an unduplicated student count at each level have been built into the enrollment codes used by schools and districts statewide.

Ungraded secondary includes students who, due to individual needs/abilities, are assigned to classes or programs without a standard grade designation.

Dropouts are defined as students who were enrolled in school at any time during the school year, but were not enrolled at the end of the school year and did not transfer, graduate, or die.

Summer dropouts are defined as students who were enrolled at the end of the prior school year, failed to enroll at the beginning of the following school year, and their absence cannot be explained

by graduation, transfer or death. These students are counted as summer dropouts from the grades in which they were *expected* to enroll.

Withdrawal type represents the unique withdrawal classifications used by school districts and charter schools to provide insight into some of the conditions associated with student dropouts. These specific codes differentiate the known dropouts (i.e., students who deliberately drop out of school, are expelled and fail to return, or leave school due to illness) from the students whose status is unknown. It is important to distinguish between known dropouts and students whose status is unknown, because each situation is different from the other and requires a different course of action to reduce the dropout rate.

Dropout rate is defined as the ratio of dropouts to enrollment, expressed as a percentage. The number of dropouts in any particular district, grade, gender or racial/ethnic category is compared to the total enrollment in the same subgroup.

Status unknown rate is a subset of the dropout rate and is defined as the ratio of status unknown students to the total enrollment, expressed as a percentage. A student is coded as status unknown by a school district after accruing 10 consecutive days of unexcused absences, or when the student's status or location is unknown to the district.

Applying the Dropout Definition

In general, a student is not counted as a dropout if there is documented evidence of transfer to another elementary or secondary school. Some examples of applying the dropout definition to determine a student's status are given below.

The following students are **not** counted as dropouts:

- Students who leave school but return before the end of the **same school year**
- Students who are remanded to an Arizona Department of Juvenile Corrections (ADJC)
- Students who transfer to home-taught programs approved by county superintendents
- Students enrolled in alternative education programs, if the programs are (1) administered by the school district, or (2) approved by the district as full-time secondary education programs
- Students who do not return to school because they completed graduation requirements during the summer or at mid-year
- Students who enter early college admissions programs before graduating from high school, if they are enrolled full-time in programs leading to a postsecondary degree
- Students who leave school at age 22 and/or receive a completion credential, such as a certificate of attendance

The following students ***are*** counted as dropouts:

- Students who leave school because they move out of the area and who are not known to be enrolled in other schools, i.e., status unknown students

- Students transferring to adult education programs in schools with courses of study not meeting standard graduation requirements (e.g., GED preparatory classes, vocational certificate programs, technical schools), regardless of whether they earn their GED certificates

- Students who leave school and take correspondence courses, unless before the end of the same school year, they earn and transfer sufficient course credits to satisfy the graduation requirements of the schools in which they are enrolled

Transfer Documentation

The school record must indicate the withdrawal status of each student who leaves the school. Documentation of a student transfer to another school consists of either (1) a request from another school for a transfer of the student's records or (2) information from a responsible adult that the student is enrolled elsewhere.

Withdrawal codes used for students may change throughout the year as additional information becomes available. For example, a student whose status is unknown at the time of withdrawal is assigned a particular withdrawal code, but if a request is later received from another school for the student's records, the withdrawal code then would be changed to indicated transfer to another school. The withdrawal status stated for students on each school's Year-End Enrollment Report reflects current knowledge at the time the report was filed.

ANALYSIS

Year-End Enrollment reports are submitted for any Arizona school district or charter school that teaches students in grades 7 through 12 or in ungraded high school classes. Throughout this report, the reader should note whether the population in each analysis refers to a single grade, the elementary grades (7 and 8), the high school grades (9 through 12 and ungraded secondary) or all grades (7 through 12 and ungraded secondary).

The enrollment count at each level represents an unduplicated count of every student enrolled for any length of time during the twelve-month reporting period. For example, a student who attended three different schools during a specific school year would be counted in enrollment at each school of attendance. However, that student would have been counted only once at the district, county and state levels. It is important to note that under Arizona law school districts have up to five years in which to make necessary corrections or reviews to their enrollment data. Subsequently, school district and charter school data may not agree with the date reported herein.

Dropout Rates

Enrollment Count, Dropout Count, Dropout Rate and Status Unknown Rate

The total student enrollment for academic year 1997-1998 was **376,675** students in grades 7 through 12, including students in ungraded high school classes. The total number of dropouts was **31,965,** representing a statewide dropout rate of **8.5 percent.**

Table 1 provides descriptive measures of dropout rates for individual grades and combined grades in the categories of elementary, high school, ungraded secondary and all grades. Also provided are enrollment counts, dropout counts, dropout rates and status unknown rates for individual and combined grades. The dropout rate was calculated by dividing the total number of students coded as dropouts by the total enrollment figure. The status unknown rate was calculated by dividing the total number of students coded as status unknown into the total enrollment figure.

Dropout Rates by Withdrawal Type

Table 2 shows the proportion of dropouts attributed to each type of withdrawal by grade and category. Each withdrawal type represents a specific classification in which school districts and charter schools provide insight into some of the conditions associated with student dropouts. In fact, each situation is unique and requires a different course of action to reduce the dropout rate.

School-Year and Summer Dropouts

Dropout data submitted by schools must indicate whether students left during the school year or during the summer. The total numbers of school year dropouts, summer dropouts and the subsequent dropout rates are provided in **Table 3.**

Dropout Rate by Gender and Grade

The enrollment count, dropout count and dropout rate by gender and grade is provided in **Table 4.** The dropout rate for females and males was calculated by dividing the total number of dropouts into the total number of students enrolled.

For example, in academic year 1997-98, there were **116,780** female students enrolled in Arizona's public high schools. Of that, **11,946** high school females were coded as dropouts by local school districts. The total number of female dropouts was then divided into the total female enrollment, resulting in a **10.2 percent** dropout rate for female high school students.

Dropout Rate by Race/Ethnicity and Grade

The enrollment count, dropout count and dropout rate by race/ethnicity and grade is shown in **Table 5.** Dropout rates are calculated by dividing the dropout count for each individual racial/ethnic group into each group's total enrollment.

For example, in the 1997-1998 school year, **140,682** White students were enrolled in Arizona's public high schools. Of that, **10,887** White high school students were reported as dropouts by local school districts, resulting in a **7.7 percent** dropout rate for White high school students.

Dropout Rate by County

School district data were aggregated to calculate enrollment counts, dropout counts, and dropout/ status unknown rates by county and grade. **Table 6** provides dropout and status unknown rates by county, state, and an overall dropout rate for the students in state juvenile corrections facilities. The Arizona Department of Juvenile Corrections (ADJC) operates juvenile correctional facilities and serves as a school district for incarcerated students.

Dropout Rates by District and School

School districts are identified by the grade range for which instruction is provided. *Unified* districts typically offer instruction in all grades, kindergarten through 12. *Elementary* districts offer instruction from kindergarten through grade 8. *Union high school* districts offer instruction in grades 9 though 12. *Accommodation* districts and *special programs* serve students with academic needs that cannot be accommodated within an existing type of district. Because of the various district types, aggregated school district data cannot be used for comparison purposes. For example, unified districts should not be compared to elementary school districts or union high school districts. However, data contained in **Table 7** and **Table 8** have been disaggregated so that accurate comparisons of disparate districts may be made.

Table 7
1997-1998 District/School Dropout Rates
Grades 9 through 12

Table 7 contains the alphabetical listing of districts and schools including grades 9-12, dropout rates for districts and schools, and the status unknown rates for districts. Information pertaining to Arizona state charter schools is designated with a † symbol.

Please note the sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. In accordance with the Family Educational Rights and Privacy Act of 1974, data containing information about three or fewer students have been replaced with an asterisk (*) to protect student privacy.

Table 8
1997-1998 District/School Dropout Rates
Grades 7-8

Table 8 contains the alphabetical listing of districts and schools for grades 7 and 8, dropout rates for districts and schools, and status unknown rates for districts. Information pertaining to charter schools is designated with a † symbol.

The sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. In accordance with the Family Educational Rights and Privacy Act of 1974, data containing information about three or fewer students have been replaced with an asterisk (*) to protect student privacy.

1996-1997 DROPOUT RATES

1996-1997
Dropout Rates

Enrollment Count, Dropout Count, Dropout Rate and Status Unknown Rate

The total student enrollment for academic year 1996-1997 was **368,609** students in grades 7 through 12, including students in ungraded high school classes. The total number of dropouts was **34,875,** representing a statewide dropout rate of **9.5 percent.**

Table 1 provides descriptive measures of dropout rates for individual grades and combined grades in the categories of elementary, high school, ungraded secondary and all grades. Also provided are enrollment counts, dropout counts, dropout rates and status unknown rates for individual and combined grades. The dropout rate was calculated by dividing the total number of students coded as dropouts by the total enrollment figure. The status unknown rate was calculated by dividing the total number of students coded as status unknown into the total enrollment figure.

Dropout Rates by Withdrawal Type

Table 2 shows the proportion of dropouts attributed to each type of withdrawal by grade and category. As mentioned earlier, each withdrawal type represents a specific classification in which school districts and charter schools provide insight into some of the conditions associated with student dropouts. In fact, each situation is unique and requires a different course of action to reduce the dropout rate.

School-Year and Summer Dropouts

Dropout data submitted by schools must indicate whether students left during the school year or during the summer. The total number of school year dropouts, summer dropouts and the subsequent dropout rates are provided in **Table 3.**

Dropout Rate by Gender and Grade

The enrollment count, dropout count and dropout rate by gender and grade is provided in **Table 4.** The dropout rate for females and males was calculated by dividing the total number of dropouts into the total number of students enrolled.

For example, in academic year 1997-98, there were **114,374** female students enrolled in Arizona's public high schools. Of that, **12,778** high school females were coded as dropouts by local school districts. The total number of female dropouts was then divided into the total female enrollment, resulting in an **11.2 percent** dropout rate for female high school students.

Dropout Rate by Race/Ethnicity and Grade

The enrollment count, dropout count and dropout rate by race/ethnicity and grade is shown in **Table 5.** Dropout rates are calculated by dividing the dropout count for each individual racial/ethnic group into each group's total enrollment.

For example, in the 1996-97 school year, **136,761** White students were enrolled in Arizona's public high schools. Of that, **11,819** White high school students were reported as dropouts by local school districts, resulting in an **8.6 percent** dropout rate for White high school students.

Dropout Rate by County

School district data were aggregated to calculate enrollment counts, dropout counts, and dropout/ status unknown rates by county and grade. **Table 6** provides dropout and status unknown rates by county, state and an overall dropout rate for the students in state juvenile corrections facilities. The Arizona Department of Juvenile Corrections (ADJC) operates juvenile correctional facilities and serves as a school district for incarcerated students.

Dropout Rates by District and School

School districts are identified by the grade range for which instruction is provided. *Unified* districts typically offer instruction in all grades, kindergarten through 12. *Elementary* districts offer instruction from kindergarten through grade 8. *Union high school* districts offer instruction in grades 9 though 12. *Accommodation* districts and *special programs* serve students with academic needs that cannot be accommodated within an existing type of district. Because of the various district types, aggregated school district data cannot be used for comparison purposes. For example, unified districts should not be compared to elementary school districts or union high school districts. However, data contained in **Table 7** and **Table 8** have been disaggregated so that accurate comparisons of disparate districts can be made.

Table 7
1996-1997 District/School Dropout Rates
Grades 9 through 12

Table 7 contains the alphabetical listing of districts and schools including grades 9-12, dropout rates for districts and schools, and the status unknown rates for districts. Information pertaining to Arizona state charter schools is designated with a ÷ symbol.

Please note the sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. In accordance with the Family Educational Rights and Privacy Act of 1974, data containing information about three or fewer students have been replaced with an asterisk (*) to protect student privacy.

Table 8
1996-1997 District/School Dropout Rates
Grades 7-8

Table 8 contains the alphabetical listing of districts and schools for grades 7 and 8, dropout rates for districts and schools, and status unknown rates for districts. Information pertaining to charter schools is designated with a † symbol.

The sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. In accordance with the Family Educational Rights and Privacy Act of 1974, data containing information about three or fewer students have been replaced with an asterisk (*) to protect student privacy.

1995-1996 DROPOUT RATES

1995-1996
Dropout Rates

Enrollment Count, Dropout Count, Dropout Rate and Status Unknown Rate

The total student enrollment for academic year 1995-1996 was **341,456** students in grades 7 through 12, including students in ungraded high school classes. The total number of dropouts was **26,401,** representing a statewide dropout rate of **9.0 percent.**

Table 1 provides descriptive measures of dropout rates for individual grades and combined grades in the categories of elementary, high school, ungraded secondary and all grades. Also provided are enrollment counts, dropout counts, dropout rates and status unknown rates for individual and combined grades. The dropout rate was calculated by dividing the total number of students coded as dropouts by the total enrollment figure. The status unknown rate was calculated by dividing the total number of students coded as status unknown into the total enrollment figure.

Dropout Rates by Type of Withdrawal

Table 2 shows the proportion of dropouts attributed to each type of withdrawal by grade and category. Each withdrawal type represents a specific classification in which school districts and charter schools provide insight into some of the conditions associated with student dropouts. In fact, each situation is unique and requires a different course of action to reduce the dropout rate.

School-Year and Summer Dropouts

Dropout data submitted by schools must indicate whether students left during the school year or during the summer. The total number of school year dropouts, summer dropouts and the subsequent dropout rates are provided in **Table 3.**

Dropout Rate by Gender and Grade

The enrollment count, dropout count and dropout rate by gender and grade is provided in **Table 4.** The dropout rate for females and males was calculated by dividing the total number of dropouts into the total number of students enrolled.

For example, in academic year 1996-97, there were **103,431** female students enrolled in Arizona's public high schools. Of that, **11,030** high school females were coded as dropouts by local school districts. The total number of female dropouts was then divided into the total female enrollment, resulting in a **10.7 percent** dropout rate for female high school students.

Dropout Rate by Race/Ethnicity and Grade

The enrollment count, dropout count and dropout rate by race/ethnicity and grade is shown in **Table 5.** Dropout rates are calculated by dividing the dropout count for each individual racial/ethnic group into each group's total enrollment.

In the 1995-96 school year, for example, **126,403** White students were enrolled in Arizona's public high schools. Of that, **10,992** White high school students were reported as dropouts by local school districts, resulting in a **9.5 percent** dropout rate for White high school students.

Dropout Rate by County

School district data were aggregated to calculate enrollment counts, dropout counts, and dropout/ status unknown rates by county and grade. **Table 6** provides dropout and status unknown rates by county, state and an overall dropout rate for the students in state juvenile corrections facilities. The Arizona Department of Juvenile Corrections (ADJC) operates juvenile correctional facilities and serves as a school district for incarcerated students.

Dropout Rates by District and School

School districts are identified by the grade range for which instruction is provided. *Unified* districts typically offer instruction in all grades, kindergarten through 12. *Elementary* districts offer instruction from kindergarten through grade 8. *Union high school* districts offer instruction in grades 9 though 12. *Accommodation* districts and *special programs* serve students with academic needs that cannot be accommodated within an existing type of district. Because of the various district types, aggregated school district data cannot be used for comparison purposes. For example, unified districts should not be compared to elementary school districts or union high school districts. However, data contained in **Table 7** and **Table 8** have been disaggregated so that accurate comparisons of disparate districts can be made.

Table 7
1995-1996 District/School Dropout Rates
Grades 9 through 12

Table 7 contains the alphabetical listing of districts and schools including grades 9-12, dropout rates for districts and schools, and the status unknown rates for districts. Information pertaining to Arizona state charter schools is designated with a † symbol.

Please note the sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. In accordance with the Family Educational Rights and Privacy Act of 1974, data containing information about three or fewer students have been replaced with an asterisk (*) to protect student privacy.

Table 8
1995-1996 District/School Dropout Rates
Grades 7-8

Table 8 contains the alphabetical listing of districts and schools for grades 7 and 8, dropout rates for districts and schools, and status unknown rates for districts. Information pertaining to charter schools is designated with a † symbol.

The sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. In accordance with the Family Educational Rights and Privacy Act of 1974, data containing information about three or fewer students have been replaced with an asterisk (*) to protect student privacy.

1994-1995 DROPOUT RATES

1994-1995
Dropout Rates

Enrollment Count, Dropout Count, Dropout Rate and Status Unknown Rate

The total student enrollment for academic year 1995-1996 was **331,658** students in grades 7 through 12, including students in ungraded high school classes. The total number of dropouts was **29,298,** representing a statewide dropout rate of **8.8 percent.**

Table 1 provides descriptive measures of dropout rates for individual grades and combined grades in the categories of elementary, high school, ungraded secondary and all grades. Also provided are enrollment counts, dropout counts, dropout rates and status unknown rates for individual and combined grades. The dropout rate was calculated by dividing the total number of students coded as dropouts by the total enrollment figure. The status unknown rate was calculated by dividing the total number of students coded as status unknown into the total enrollment figure.

Dropout Rates by Type of Withdrawal

Table 2 shows the proportion of dropouts attributed to each type of withdrawal by grade and category. Each withdrawal type represents a specific classification in which school districts and charter schools provide insight into some of the conditions associated with student dropouts. In fact, each situation is unique and requires a different course of action to reduce the dropout rate.

Dropout Rate by Gender and Grade

The enrollment count, dropout count and dropout rate by gender and grade is provided in **Table 4.** The dropout rate for females and males was calculated by dividing the total number of dropouts into the total number of students enrolled. For example, in academic year 1994-95, there were **101,366** female students enrolled in Arizona's public high schools. Of that, **10,985** high school females were coded as dropouts by local school districts. The total number of female dropouts was then divided into the total female enrollment, resulting in a **10.8 percent** dropout rate for female high school students.

Dropout Rate by Race/Ethnicity and Grade

The enrollment count, dropout count and dropout rate by race/ethnicity and grade is shown in **Table 5.** Dropout rates are calculated by dividing the dropout count for each individual racial/ethnic group into each group's total enrollment. In the 1995-96 school year, for example, **124,216** White students were enrolled in Arizona's public high schools. Of that, **11,296** White high school students were reported as dropouts by local school districts, resulting in a **9.1 percent** dropout rate for White high school students.

Dropout Rate by County

School district data were aggregated to calculate enrollment counts, dropout counts, and dropout/ status unknown rates by county and grade. **Table 6** provides dropout and status unknown rates by county, state and an overall dropout rate for the students in state juvenile corrections facilities. The Arizona Department of Juvenile Corrections (ADJC) operates juvenile correctional facilities and serves as a school district for incarcerated students.

Dropout Rates by District and School

School districts are identified by the grade range for which instruction is provided. *Unified* districts typically offer instruction in all grades, kindergarten through 12. *Elementary* districts offer instruction from kindergarten through grade 8. *Union high school* districts offer instruction in grades 9 though 12. *Accommodation* districts and *special programs* serve students with academic needs that cannot be accommodated within an existing type of district. Because of the various district types, aggregated school district data cannot be used for comparison purposes. For example, unified districts should not be compared to elementary school districts or union high school districts. However, data contained in **Table 7** and **Table 8** have been disaggregated so that accurate comparisons of disparate districts can be made.

Table 7
1994-1995 District/School Dropout Rates
Grades 9 through 12

Table 7 contains the alphabetical listing of districts and schools including grades 9-12, dropout rates for districts and schools, and the status unknown rates for districts.

Please note the sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. In accordance with the Family Educational Rights and Privacy Act of 1974, data containing information about three or fewer students have been replaced with an asterisk (*) to protect student privacy.

Table 8
1994-1995 District/School Dropout Rates
Grades 7-8

Table 8 contains the alphabetical listing of districts and schools for grades 7 and 8, dropout rates for districts and schools, and status unknown rates for districts.

The sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. In accordance with the Family Educational Rights and Privacy Act of 1974, data containing information about three or fewer students have been replaced with an asterisk (*) to protect student privacy.
